

I am an XM radio user. XM is not a replacement for other radio but offers other products to the PAYING SUBSCRIBER. XM can offer valuable traffic and weather information to PAYING SUBSCRIBERS without having to wait until the designated times of the regular radio show. This is important to working people out in the traffic of major cities. the NAB's petition 04-160 is trying to limit what PAYING SUBSCRIBERS are allowed to hear from their fee-based service and should be soundly rejected.
